

Slide Adapter

Slide Adapter!

Convert your Mighty Probe or Striking Head probe into a mini-slide hammer probe. Now you can pound your way through those extremely difficult spots.

All striking pieces are manufactured from high strength impact resistant tool steel. This steel is designed for minimal distortion and is used in applications such as tooling for large punch presses and chisels.

The slide adapter threads between the handle of your probe and the shaft to create a tight fitting well integrated tool.

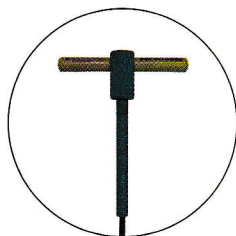

Slide Adapter™ features:

Highlights:

- 6" stroke
- 8" overall length
- smooth strokes
- a slide stop will lock the shaft in place
- allows the shaft to be pounded in or out

Material:

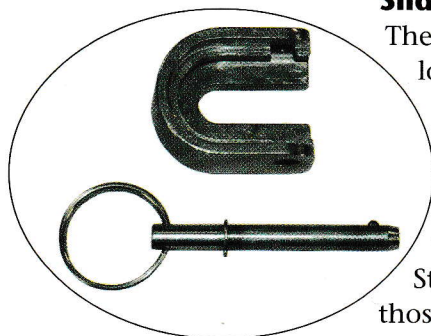

- High strength tool steel
- Heat treated to extend durability

Striking Head with Slide Adapter

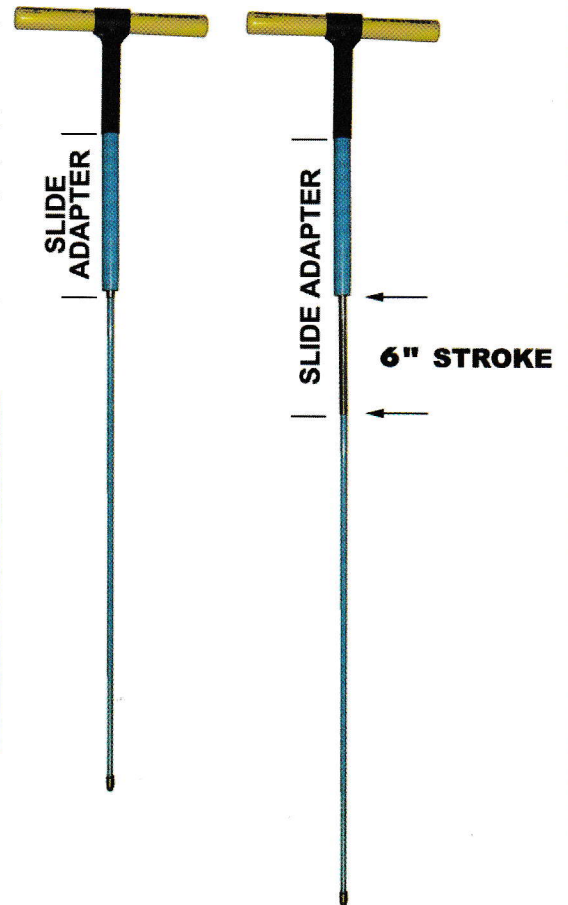

Mighty Probe with Slide Adapter

Slide Adapter Stop.

The Slide Adapter Stop installs on an integrated groove located on the Slide Adapter. It traps the slide and prevents it from moving. The Slide Adapter Stop is designed to be removed quickly and conveniently.

When installed, the Slide Adapter Stop gives you the feel of a solid, non-sliding probe. Removing the Stop makes it easier to pound your way through those difficult areas.

Size	Item	Price
